

4 REASONS TO CHOOSE HYBRID CLOUD

Got your head in the cloud, but still want some data on the ground? Consider hybrid cloud to get the best of both worlds.

Learn how hybrid cloud can accelerate your journey from legacy to future IT.

HYBRID CLOUD INDUSTRY TRENDS AT-A-GLANCE:

81%

of enterprises already use multi-cloud approach

Multi-cloud is the preferred strategy among enterprise organizations

Hybrid market will grow from

2016

\$33.28B

to 2021

\$91.74B

MODERNIZING YOUR CLOUD STRATEGY REQUIRES:

Stability | Agility | Scalability

A hybrid cloud can help!

1. CUT THE FLUFF

so you can maximize your data

- Reduce your presence on-premises
- Lower costs to procure, implement and operate
- Cut back on hardware and software

2. EASE INTO THE CLOUD

so you can move at your own pace

- Increase flexibility to test and work in the cloud
- Transition without uprooting your entire ecosystem all at once
- Maintain your on-premises operational consistency
- Complement your data processes with advanced services in the cloud

3. OPERATE WITH FLEXIBILITY

so you can work faster and smarter

- Manage your data as you see fit
- Move easily between public and private cloud
- Maximize your control and security
- Access services that cannot be built on-premises
- Alter capacity on-demand to meet changing needs in real-time

4. STAY AHEAD OF THE CURVE

so you can better your business

- Meet business expectations
- Better partner collaboration
- Beat the competition
