To properly stage the logo, a minimum clearance between the logo and other elements must be maintained.

The cap height of the “I” in the logo indicates the measurement of minimum clearance between the logo and other elements on all sides of the Logo.
• Vertical: The width of the logo must always be at least 125 pixels for on-screen or 1” (25mm) for print.
• Horizontal: The width of the logo must always be at least 200 pixels for on-screen or 2.5” (75mm) for print.

**VERTICAL (PREFERRED VERSION)**

- On-screen: 125 px | Print: 1”
- Actual Minimum size

**HORIZONTAL**

- On-screen: 200 px | Print: 2.5”
- Actual Minimum size
The logo may not be displayed as a primary or prominent feature on any non-Sirius materials. Companies using the logo pursuant to these guidelines must also display in the primary and more prominent position, their own logo(s), business name, product names, or other branding.

The logo may not be imitated or used as a design feature in any manner.

The logo may not be used in a manner that would disparage Sirius or its products or services.

Neither the logo nor the Sirius name may be used in any other company name, product name, service name, domain name, website title, publication title, or the like.

Non-Sirius materials should not mimic any Sirius advertising, product packaging, or website design.
Sirius Logo / Additional Requirements and Examples of Incorrect Logo Usage

The logo must be used as provided by Sirius with no changes, including but not limited to changes in the color, proportion, or design, or removal of any words or artwork. The logo may not be animated, morphed, or otherwise distorted in perspective or appearance.

**DON'T**

- The Icon may never be removed from the logo font.
- Do not place master brand in conjunction with a co-branded, descriptive or product logo.
DON'T

Don't change the size relationship of the symbol to the logotype.

Don't create logo “lockups” by adding in close proximity to the logotype. Use only approved logos

Don't compress the Logo.

Don't compress the Logo.

Don't add effects like shadows, dimensions, and gradients to the Logo.

Don't create logo: “lockups” by adding text in close proximity to the Logo.

Don't add anything to the symbol.

Don't alter the logo specifications within the symbol or the logotype.
DONT

Don’t attach text of any kind to the symbol.

Don’t place the logo over busy photographic backgrounds.

Don’t change the logo to a single color (other than the approved white version).

The logo must not be incorporated or used in any manner as part of, or in close proximity to another company’s name, domain name, product or service name, logo, trade dress, design, slogan, or other trademarks.

Don’t place the logo on backgrounds that provide insufficient contrast.

Don’t alter the spacing in the symbol or text.

The logo must appear only in a horizontal position.
Corporate Design

Design Overview
Typography
Color Palette
Iconography & Application
Gradients
Our primary blue colors serve to create a visual connection to Sirius brand and to provide an accent color to draw attention to important items.

Secondary colors support the primary color by expanding the breadth of the palette. These colors are used as slight variations on the Primary color palette to create a bit more depth.

Tertiary colors add warm accents to the palette. Use them to add color accents, alerts, badges and as minor accents.

Neutral colors soften the color palette further so that the other colors, including colors within photography, do not compete with each other for attention. Use them for type, separation bars and buttons that are secondary actions.
Throughout Sirius Open Sans is the
font family of note for all our
messaging. Montserrat is used for
major headline elements and fonts that
need a heavier, more powerful weight.
Our typographic system uses the two
fonts to, each of which serves a specific
purpose that helps define information
hierarchy.

Open Sans is a sans-serif typeface
designed by Steve Matteson and
commissioned by Google. It was
developed with an “upright stress,
one form, and a neutral, yet friendly
appearance” and is “optimized for
legibility across print, web, and mobile
interfaces.” Featuring wide apertures
on many letters and a large x-height
tall lower-case letters), the typeface is
highly legible on screen and at small
sizes. It belongs to the humanist genre
of sans-serif typefaces, with a true italic.

Montserrat is a geometric sans-serif
typeface designed by Argentinian
designer Julieta Ulanovsky. The design
was inspired by signage from her
historical Buenos Aires neighborhood
of the same name. The uppercase G
and J really set it apart.

Open Sans Light is intended for most
main copy items like paragraphs, lists,
links, and labels.

Open Sans Bold gives emphasis to
main section headers, page headings,
navigation, and action buttons.

Montserrat Bold gives emphasis to
main section headers, page headings,
navigation, and action buttons.
The start of gradients for the cases where you might need them. We need to discuss more.
