

**Date:** September 1, 2013

**Name of Product:** Check Point Smart Console and Software Blades

**Contact for more Information:** Malcolm Levy – Check Point Certification Manager (mlevy@checkpoint.com), or Joy Hargrove, Check Point Federal Certifications Engineer (jhargrov@checkpoint.com)

## Summary Table - Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and Explanations
Section 1194.21 Software Applications and Operating Systems	Included	This product includes a GUI Management Client Called Smart Console that includes administration, reporting and monitoring modules for ALL Check Point Security Products.
Section 1194.22 Web-based internet information and applications	Not Applicable	While a Web UI is optionally provided for gateway configuration, the product includes a command line shell (CLISH) built into the OS. The CLISH is inherently 508 conformant because it is text based and relies on keyboard for navigation. All functions of the gateway can be configured and monitored through the CLI shell.
Section 1194.23 Telecommunications Products	Not Applicable	
Section 1194.24 Video and Multi-media Products	Not Applicable	
Section 1194.25 Self-Contained, Closed Products	Not Applicable	
Section 1194.26 Desktop and Portable Computers	Not Applicable	
Section 1194.31 Functional Performance Criteria	Not Applicable	
Section 1194.41 Information, Documentation and Support - Detail	Included	

NOTE: All Check Point hardware security appliances are considered exempt from Section 508 because of the 1194.3(f) Back Office Exemption Clause. Products located in spaces frequented only by service personnel for maintenance, repair, or occasional monitoring of equipment are not required to be compliant with section 508.

However, the software used to administer these hardware security gateways is not exempt from Section 508. The remote configuration and management for all hardware products is done through either Smart Console or CLISH.

## Section 1194.21: Software Applications and Operating Systems

### Check Point Smart Console Management client application

508 Clause	Criteria	Supporting Features	Remarks and Explanations
1194.21(a)	When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Support	Application uses standard Microsoft Windows controls and supports all Windows built in accessibility features.
1194.21(b)	Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supports	Supports all Windows built in accessibility features.
1194.21(c)	A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Does Not Support	
1194.21(d)	Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Supports	All information conveyed by images also conveyed via text.
1194.21(e)	When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supports	Whenever bitmaps are used, alternative means of identifying controls are available.

1194.21(f)	Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supports	
1194.21(g)	Applications shall not override user selected contrast and color selections and other individual display attributes.	Not Applicable	Application does not override display attributes.
1194.21(h)	When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Not Applicable	While there is occasional animation, it is only for aesthetics. Not required for normal function.
1194.21(i)	Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supports	Color coding offered as an option on some objects but not necessary for normal functions.
1194.21(j)	When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Not Applicable	There is not a feature to adjust color or contrast within the product.
1194.21(k)	Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Not Applicable	The product does not use flashing or blinking text.
1194.21(l)	When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not Applicable	The product does not use electronic forms.

## Section 1194.41: Information, Documentation and Support

508 Clause	Criteria	Supporting Features	Remarks and Explanations
1194.41(a)	Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supported	All documentation is made available in the form of PDF files. In addition, standard Windows online help is available.
1194.41(b)	End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	Accessibility information is available through the Check Point TAC upon request.
1194.41(c)	Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported	Support services are available via telephone, email, chat and Web.
