

THE SIRIUS CLOUD ADVANTAGE

Cloud solutions provide a rich set of platforms and ecosystems that—when chosen and implemented effectively—can provide disruptive business advantages. Sirius goes beyond the technology and applies engaging, practical and proven methodologies to help organizations in their transformational journey from legacy to future-state IT.

SIRIUS CLOUD MANAGED SERVICES POWERED BY AMS

ENABLING STRATEGIC DEPLOYMENT AND OPERATION OF AWS MANAGED SERVICES (AMS)

Many enterprises moving toward full exploitation of AWS technologies are finding that their engineering staff need help gaining essential skills. They turn to reliable partners to close these gaps and help speed cloud adoption, but are faced with even harder choices when evaluating cloud managed services partners.

Sirius Cloud Managed Services powered by AMS enables organizations to deploy native and non-native workloads into a managed AWS or hybrid environment, allowing their IT resources to focus on achieving business objectives. By leveraging Sirius' extensive cloud, managed services and professional services experience along with the proven cloud management and operational excellence of AMS, this collaborative solution provides an integrated, optimized capability for executing cloud transitions, accelerating migrations, reducing capital and operational costs, improving security and compliance, and reducing risk with unprecedented speed and reliability.

AWS launched AMS operations management service to provide management of clients' cloud infrastructure up to and including the patched operating system, with native AWS tooling and employees. Clients can now leverage the power of the cloud and managed by the cloud service provider, together with the unique offerings of Sirius that support innovation, accelerate business results and deliver a competitive advantage.

With Sirius Cloud Managed Services powered by AMS, we assume responsibility for virtually everything in the Cloud Shared Responsibility model, except for the client's data itself. As an added benefit, no long-term contracts are required. This allows clients to leverage the cloud as a metered, elastic experience, while receiving the highest quality service level commitments in the market. With Sirius Cloud Managed Services powered by AMS, organizations can put aside concerns about their ability to scale in the cloud, conformance with governance and compliance requirements, data and access security, or uncontrollable cost commitments.

SIRIUS CLOUD MANAGED SERVICES POWERED BY AMS HELPS YOU DEPLOY, DELIVER AND MANAGE APPLICATIONS IN AWS

With Sirius Cloud Managed Services powered by AMS, we manage AWS on your behalf, providing a secure AWS Landing Zone, features that help you meet various compliance program requirements (HIPAA, HITRUST, GDPR, SOC, NIST, ISO, PCI), a proven enterprise operating model, ongoing cost optimization, and 24x7 infrastructure management. By implementing best practices to maintain your infrastructure, Sirius helps reduce your operational overhead and risk. We also automate common activities such as change requests, monitoring, patch management, security and backup services, while providing full life cycle services to provision, run and support your infrastructure.

SIRIUS CLOUD MANAGED SERVICES POWERED BY AMS INCLUDES:

- Compliant and secure AWS Landing Zone
- 24x7x365 support from certified cloud engineers
- Unlimited changes, incidents, alerts and service requests
- Orchestrated patch and backup
- 15-minute response SLA and four-hour restoration SLA for incidents
- Monthly reports to include recommendations on cost savings
- No long-term contracts

SIRIUS CLOUD TRANSITIONAL SERVICES (CTS) ENHANCES YOUR AWS ENVIRONMENT

Sirius CTS helps accelerate cloud adoption and quickly address changing market dynamics by providing clients with flexible AWS Engineering as a Service. Sirius CTS helps organizations that are struggling to hire individuals with the skills needed to perform continuous AWS services optimization. With Sirius CTS, you can add AWS skills at virtually any point within a project for enhanced flexibility and adaptability. Sirius CTS includes an engagement and requests process that allows Sirius to allocate skill sets and hours as needed for projects, with the ability to scale and fluctuate as the project evolves for a guaranteed, "right-sized" support model.

SIRIUS AND AWS

As an AWS Advanced Consulting Partner with 200 AWS certifications, Sirius is dedicated to helping organizations develop a successful and cohesive cloud strategy that will support innovation, accelerate business results and deliver a competitive advantage. Sirius employs a dedicated AWS practice consisting of more than 100 technologists and consultants who are certified in the design, deployment and operation of applications and infrastructure on AWS. We can help you combine best-of-breed IT infrastructure with all the business benefits—such as flexibility and elasticity—that you expect from AWS cloud solutions. And we continue to build on our strategic partnership with AWS, molding a relationship that will elevate our expertise and our ability to assist clients with quick and easy implementation of modern IT application, infrastructure, and DevOps capabilities.

THE ADVANTAGE THAT COMES WITH CLOUD EXPERTISE

With a team of experienced, skilled and certified cloud professionals, Sirius provides the enterprise-class cloud services that organizations need to deliver the value, speed and security required to minimize cloud challenges and maximize results. Our world-class solutions, designed and built on today's leading technologies, ensure that your cloud evolution is aligned with your business needs.
