

EXCELLENCE IN CLIENT CARE
& ACHIEVING DESIRED OUTCOMES

WHITE GLOVE TRIAL

Tanium as a Service (TaaS) is a zero-infrastructure endpoint management and security platform that doesn't require capital costs, software installs or data center infrastructure investments. TaaS allows organizations to quickly stand-up the platform and put it to work in a matter of hours or days. With a Sirius White Glove Trial, you will have the benefit of an experienced Security Architect by your side every step of the way.

Start your Tanium-as-a-Service trial with Sirius and see what sets us apart!

OFFERED AS A COMPLIMENTARY SERVICE FOR A LIMITED TIME ONLY!

SIRIUS WHITE GLOVE TRIAL

SCOPING SESSION

Sirius experts will meet with you to understand your goals so we can align your trial experience to help you achieve them.

INSTALLATION/PROVISIONING

We'll provision your trial to align with the outcomes identified during the scoping session.

TEAM TRIAL ENABLEMENT

Because your trial results are directly impacted by your team's understanding of the solution, Sirius will conduct a 1 – 3-hour workshop to introduce your team to the solution's features, capabilities and dashboard.

PROGRESS REVIEW

On a weekly cadence, Sirius will work with your team to keep the trial on schedule and to help you measure and manage its success.

PERFORMANCE EVALUATION

At the end of the trial, Sirius will lead you through a final evaluation of how the trial delivered against your business objectives. We will work with you to take the next step, whether you choose to purchase the solution or move in an alternative direction.
