THE SIRIUS DIFFERENCE

As a leading IT solutions provider, Sirius delivers end-to-end solutions including strategy development, technology selection, implementation and operation. We offer multiple delivery models, including on-premises, off-premises, cloud, and as-a-Service models.

- #1 Ranking on Channel Future's MSP 501/NextGen 101, following 3 years as #1 ranked worldwide in the MSP501
- 2 SOCs and 3 world-class command centers
- 400+ dedicated managed services technical staff
- 400+ managed services clients
- 68.2 NPS Score (excellent ranking)
- 3,000+ current certifications across infrastructure, cloud, applications and security technologies
- 2020 CRN Triple Crown Award, seven-time winner (Solution Provider 500, Tech Elite 250, Fast Growth 150)

SIRIUS MANAGED SERVICES PORTFOLIO

We optimize your environment before onboarding and throughout the life of the relationship. You'll engage directly with Level 2 and 3 engineers from one of our four Command Centers located in Omaha, NE; Elk Grove Village, IL; Toronto, ON; or Chennai, India. We use market-leading, ITIL-aligned management tools to ensure repeatable and consistent service delivery.

MANAGED CLOUD SERVICES

We help make your cloud initiatives successful – from application through migration and management with: Cloud Enablement Services, Managed Private Cloud, Managed Cloud – AWS and Azure, Managed Security for AWS and Azure, Sirius Power Cloud, SIEM as a Service, Monitoring as a Service, Patching as a Service, and Backup as a Service

ADVANCED APPLICATION SERVICES

We help you modernize and migrate applications to cloud infrastructures with: Application Modernization, Managed Cloud Application Services, and Advanced Analytics

MANAGED INFRASTRUCTURE

We offer ITIL-based monitoring and management services to help you manage your existing environments and focus on value-driving initiatives with: Mainframe, Converged and Hyper-Converged Platforms, OS, Database, Storage, Network, Unified Communications, Application Managed Services, and Service Management

ONETOUCH SUPPORT

We offer premium support from senior engineers familiar with your environment.

AGGREGATION SERVICES

We help identify, select and procure colocation and connectivity, including private, public and alternate service offerings with: global colocation evaluation and selection, connectivity portfolio analysis and procurement, SD-WAN, and Unified Communications as a Service.

MANAGED SECURITY SERVICES

We offer proactive management services to reduce your security burden, with a focus on continuous engineering and tuning. We secure both your on-premises and future-state environments with: Data Security, Managed Next Gen Firewall, Managed SIEM, Managed WAF, Managed EndpointEDR/MDR, Ransomware Protection, Managed Proxy, and Managed Vulnerability Scanning

MANAGED RESILIENCY SERVICES

We help maintain business continuity and recover critical applications and data with: Managed Backup, Managed Disaster Recovery, and Managed High Availability

ENTERPRISE COLOCATION & SIRIUS DATA CENTERS

Run your strategic cloud workloads at our data center or at other third-party facilities, backed by decades of data center strategy, engineering and migration expertise. Our state-of-the-art, Uptime Certified Tier III data center near Chicago is designed specifically for organizations looking for flexible, private and secure data center suite options.

Sirius Data Centers help you:

- Have full control of your data center infrastructure in a customizable, private and secure suite
- Access higher data density and floor space options, so you maximize your compute per square foot and reduce capital expenses
- Fit into a smaller footprint with more compute power, so you save on operating costs, manage less space, and have more room to grow

For more information, please contact your Sirius client executive, visit siriuscom.com, or call 800-460-1237.
