- Cutover & support

Networking Certifications
CCIEs in:

- Enterprise Infrastructure
- Enterprise Wireless
- Security
- Service Provider

- Over 1,000 networking certifications from various vendors
- Master Certified Partner

NETWORKING SOLUTION AREAS

COLLABORATION

Organizations need new, better ways to help teams work together more easily. Collaboration technologies bring people and information together more efficiently to shorten decision-making cycles, increase productivity, enhance participation across the organization, and improve workflow.

ENTERPRISE NETWORKING

Enterprise networking is the enabling foundation of your entire IT infrastructure, including campus switching, WAN connectivity and wireless infrastructure.

DATA CENTER

IT infrastructure virtualization solutions include the network, storage systems and servers across systems environments and manufacturers.

SECURITY

Network security products and solutions include the design and implementation of VPN, data center, mobility, perimeter and anti-malware technologies.

NETWORKING CLOUD SOLUTIONS

Cloud networking solutions include cloud managed infrastructure and hybrid cloud integration.

MOBILITY

Sirius has a dedicated mobility practice staffed by certified consultants who specialize in all elements of successful mobility solution deployments.

THE INTERNET OF THINGS (IOT)

The Internet of Things (IoT) is the networked connection of sensors embedded in virtually anything, from appliances, environmental systems and cars to devices that are worn by—or even implanted in—people. Data from these can be sent, received, analyzed, modified and customized in real time. Sirius offers multiple products and solutions to help integrate your IoT project, as well as big data and analytics solutions to help you understand and maximize the value of data from the IoT.
