

SECURE YOUR DIGITAL ENTERPRISE AT THE ENDPOINT

Turn decentralization and scale into an advantage. Tanium helps you take on the challenges of managing and securing a dynamic environment with real-time visibility, effective control and rapid response. Using modular “plug and play” architecture, Tanium reduces complexity, improves efficiency and closes the gap between your operations and security teams.

Specially-negotiated pricing now available only from Sirius!

MARKET-LEADING DISCOUNTS

We did the negotiating for you! New Tanium customers get exclusive discounts on any Tanium module for the length of their term from Sirius through December 31, 2021.

SAVING ON ENDPOINT SECURITY AND MANAGEMENT STARTS AT SIRIUS

Sirius has negotiated special pricing and we’re passing on the savings to you. New Tanium customers who purchase Tanium solutions from Sirius before December 31, 2021 are eligible.

Layered solutions are no longer up to the challenge of the modern, work-anywhere environment. Tanium’s endpoint management and security solution gives organizations the capabilities to see, control and respond to events on endpoints anywhere – all on a single platform.

ENDPOINT HYGIENE

Reduce risks by more effectively operating your environment, unifying IT operations and security teams around a single endpoint platform, and simplify your IT costs and complexity.

Tanium helps to continuously identify and accelerate remediation of risk in your environment quickly and at scale.

- Discover and manage assets
- Report offline assets
- Scan and identify risks
- Update applications
- Patch operating systems

ENDPOINT OPTIMIZATION

Gain greater visibility and control across teams to mitigate outages, save time by improving team efficiency, and reduce costs by reclaiming assets, eliminating tools and modernizing your IT.

Tanium gives you comprehensive endpoint visibility and control to reduce unnecessary IT costs, drive efficiencies and improve your return on IT investments.

- Reclaim underutilized assets
- Consolidate to an endpoint platform
- Reduce IT support costs

CLOUD INTEGRITY

Unify your visibility and control for all assets across your organization and confidently mitigate endpoint threats and vulnerabilities across mixed environments.

Tanium provides one platform to manage and secure every server, anywhere.

- Visibility and control
- Endpoint protection
- IT asset management
- Threat detection and response
- IT operations management
